

10-zone Matrix T-6202

Descriptions

- * It is an equipment used for zone division based on power for a single power input amplifier.
- * It is suitable for a small broadcasting system with one small power amplifier that need zone division.

Features

- * Standard cabinet design (2U), black alumina brushed panel, user-friendly drawing, exquisite craftsmanship, high-grade appearance.
- * With 1 channel background music amplifier input and 1 emergency broadcast amplifier input.
- * 10-channel power signals are output to 10 zones, which can be arbitrarily controlled and selected.
- * Two-channel alarm short-circuit trigger signals are output to the alarm signal generator.
- * Each zone has a separate LED indicator. The indicator can show the working status of each zone. When there is paging and alarm, the LED indicator changes from green to red.
- * There are 10-channel alarm short-circuit trigger signal cascade outputs to the next single-line ten-zone matrix.
- * With RJ45 communication protocol interface, it can be connected to the system controller, so that the controller can automatically and accurately control each zone.
- * The touch key is used to set the address code, which is simple and convenient. And it meets the address confirmation when used with the host.
- * With power-off memory function, it can automatically select the memory when the mains power is restored.

Specifications

Model	T-6202
Power supply	~220V 50Hz
Power consumption	40W
Dimensions	484×303×88mm
Weight	8Kg
