Features

* Unique appearance design.
* With the network expansion functions.
* With power supply function.
* One input three output connected units, realizes network functions, with communication instruction.
* The connection between the controller and units, implementing an interface extended function.
* Adopt 100M network transportation, can be achieved hand in hand cascade.
* The three switch controller ports, SSRAM, 10 / 100M Ethernet ports, each port supports IEEE802.3, IEEE802.3u, IEEE802.3×specifications, with strong anti-jamming capability.Work with TS-0221DC power supply adapter to achieve long distance power supply.

Specifications

Model	TS-0221
Max Power Consumption	1.5W
Power Supply Voltage	36V
Interface Method	Special cables (6 cores)
Color	Silver
Operational Temp	-10℃°~+60℃°
Environment Humidity	20%~80% Retive humidity non-condensing
Weight	0.5Kg
Dimensions(mm)	156(L)×111(W)×32(H)
